

# UNIT Protocol (UNIT)

Utility-Focused Digital Token Infrastructure

BEP-20 | BNB Smart Chain

Pitch Deck v1.3 – Updated 2026-02-23

# **Vision**

Building transparent, configurable, and verifiable on-chain utility infrastructure on BNB Smart Chain.

## **The Problem**

- Lack of transparency in token mechanics
- Hidden supply risks or unclear allocations
- Overpromised yields without infrastructure
- Limited long-term ecosystem utility

## **The Solution**

- Fixed total supply (minting disabled)
- On-chain configurable parameters (within coded limits)
- Transparent allocation framework
- Public blockchain verification

# Token Overview

Network	BNB Smart Chain (BEP-20)
Total Supply	1,000,000,000 UNIT
Minting	Disabled
Contract	0x4f5710c96C446b133C59AF006A36d07414B52a9

# Distribution Framework

Liquidity (progressive)	20%
Strategic Reserves	30%
Contributors & Builders	25%
Public Ecosystem Distribution	15%
Ecosystem & Partnerships	10%

## **Staking Program (In Development)**

- Staking smart contract infrastructure developed and tested
- Rewards pool wallet funded with 5,000,000 UNIT
- Up to 15,000,000 UNIT allocated from Contributors allocation
- Additional allocation deployed progressively
- No APR or guarantees disclosed prior to launch

# Transparency Commitment

All token allocations, transfers, and contract parameters are verifiable on-chain.  
Blockchain data remains the single source of truth.

## **Legal Disclaimer**

UNIT is a digital utility token. Nothing in this presentation constitutes financial, legal, or investment advice. Digital assets are volatile and may lose all value.
