

UNIT Protocol – Technical & Ecosystem Whitepaper v1.3

BNB Smart Chain (BEP-20) Utility Token Infrastructure

Overview

UNIT Protocol (UNIT) is a BEP-20 utility token deployed on BNB Smart Chain. The protocol is designed around transparent on-chain configuration, fixed supply mechanics, and verifiable token allocation. All core parameters and token movements are publicly auditable through blockchain explorers.

Token Overview

Token Name	UNIT Protocol
Symbol	UNIT
Network	BNB Smart Chain (BEP-20)
Contract Address	0x4f5710c96C446b133C59Af006A366d07414B52a9
Maximum Supply	1,000,000,000 UNIT
Minting	Disabled (entire supply minted at deployment)

Token Allocation Framework

Liquidity (progressive)	20%
Strategic Reserves	30%
Contributors & Builders	25%
Public Ecosystem Distribution	15%
Ecosystem & Partnerships	10%

Allocation percentages represent a structural framework for ecosystem development. All wallet balances and token transfers remain publicly verifiable on-chain.

Staking Program (Under Development)

UNIT Protocol is preparing a staking rewards mechanism intended to support long-term ecosystem participation. The program is currently in development and internal testing phase.

Staking Rewards Pool Wallet: 0x4F60408d0740ef570B67bE9433f35E9D2d69992E

Funding framework: Up to 15,000,000 UNIT may be allocated from the Contributors & Builders allocation. Currently, 5,000,000 UNIT are designated for initial staking distribution. Additional allocation may occur progressively based on ecosystem participation and development milestones.

No guarantees are made regarding yield structure, timing, participation mechanics, or future availability. All staking-related allocations remain transparent on-chain.

Transparency & Governance

The smart contract operates with fixed supply mechanics. Configurable parameters, such as transaction limits or fees, may be adjusted within predefined limits. All administrative actions are permanently recorded on-chain.

Risk & Legal Disclosure

UNIT Protocol is an experimental digital utility token. Nothing in this document constitutes financial, legal, or investment advice. Digital assets involve volatility, regulatory uncertainty, and risk of total loss. Participants are solely responsible for their own due diligence and decisions.
